Mandarin Business Solutions Limited

the internet company

Whatever you need for your business Mandarin has the answer.

Web Design

From initial ideas to final conception. Established for more than five years we can establish your presence on the internet with a minimum of delay.

You may need just a few simple pages or you may want to sell hundreds of products. Whatever you need we can tailor a solution perfectly suited to your precise requirements.

Web Site Marketing

Have you tried to find your own web site recently? If it was difficult for you then imagine what a new customer trying to find you might think. As the requirements of the search engines change, it is important to keep up to date and make sure your site remains visible.

We work for many national and local clients with great success.

Web Site Hosting

We provide full hosting and email facilities using the latest hardware platforms. Most importantly, all of our servers are located in the UK – a major consideration for site marketing.

Domain Registration

Every web site requires its own unique domain name. We offer a full domain purchase and management service, looking after all administrative issues and ensuring your domain is renewed each year as required.

Content Management

Many sites are built to incorporate a Content Management System. This allows the site owner to carry out updates as required.

This system is ideal for those who like to "fine tune" their web site on a regular basis.

Design and Print

Brochures designed to promote your business off line can be essential. Many people still prefer to read something in their hand than on screen.

It allows people to read about you at their leisure. We offer a low cost design service and are happy to print low volumes.

Computer Support

We can offer help and advice in choosing a new computer, can set it up for you and make sure it performs as well as possible.

If you have more than one computer, a simple network can greatly improve the way you work and save time and money as well.

Help and Advice

We are always available to offer help and advice. If you think we may be able to help your business just give us a call.
